Introduction

1. Product features

- 1.1 Air-proof design and efficient cooling channels can greatly enhance the overall stability and service life;
- 1.2 LED lamp with a service life of 30,000 hours, more beautiful colors and richer details;
- 1.3 Electronic zooming allows free adjustment of image sizes;
- 1.4 Professional failure diagnosis and protective measures;
- 1.5 The whole machine is compact and portable;
- 1.6 Available image models of 16:9 and 4:3;
- 1.7 Ultra-quiet and dust-proof design that eliminates the need for internal cleaning during its service life;
- 1.8 58W ultra-low power consumption, more energy-efficient and more environmentally friendly;
- 1.9 Multiple functional interfaces: HD/SD/USB/AV/VGA/AUDIO OUT;
- 1.10 The appearance is beautiful and gorgeous.

Introduction

2. Precautions

1. Please read this manual carefully before using the projector;
2. In order to ensure the stability of the power supply of this projector, please use a power supply line that meets the national power consumption standard and a power socket with protective measures such as grounding;
3. Please use the power type indicated on the projector and the power line included for power supply;
4. Do not disassemble or modify the projector by yourself, or the Company will not offer free warranty service;
5. Do not look directly into the projector lens while it is working, or it will burn your eyes ;
6. Do not place the projector on objects such as cloth or blankets that may cause the vents to be blocked;
7. The product is not waterproof and should avoid being watered or splashed, and objects filled with liquid shall not be placed near the product such as vases or cups;
8. To prevent electric shock, please protect the projector from rain or dampness;
9. Please turn off the power supply and disconnect the power line from the plug if the projector is not used for a long time;
10. Please use the original foam and other vibration-proof materials when transporting the product;
11. If the product is damaged, do not attempt to repair it yourself. Please contact the Artlii.

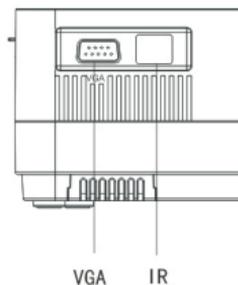

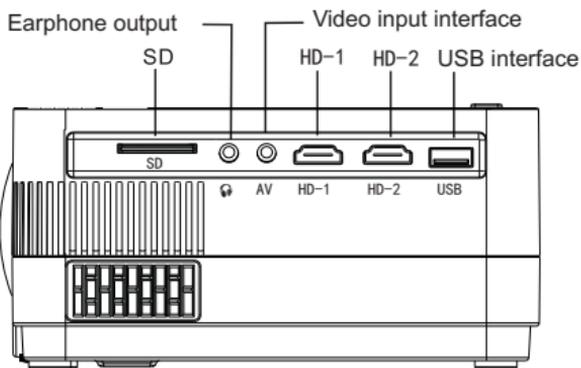

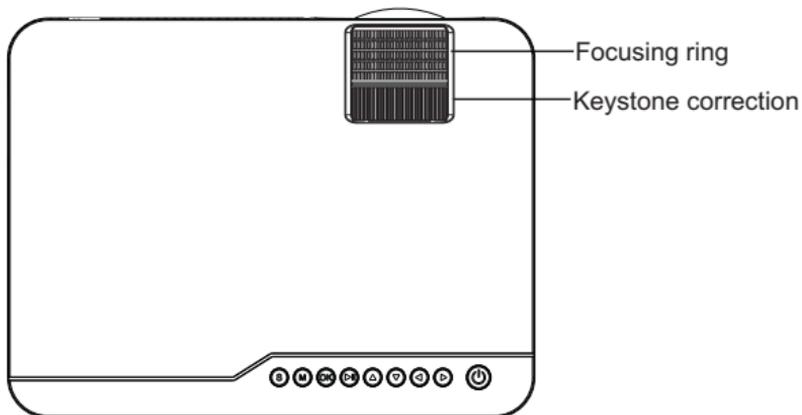

Tips:

Set language

Press the " M " key to select "OPTION" screen . Change the language in "Osd Language", and then click "OK".

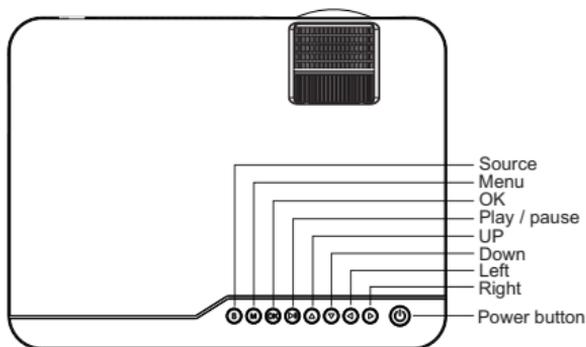

Introduction

3、Product function structure diagram

Introduction

4.Key function diagram

Left: used to move to the left, confirm the signal source channel, or lower the volume

Right: used to move to the right, or increase the volume

Up: used to move upward

Down: used to move downward

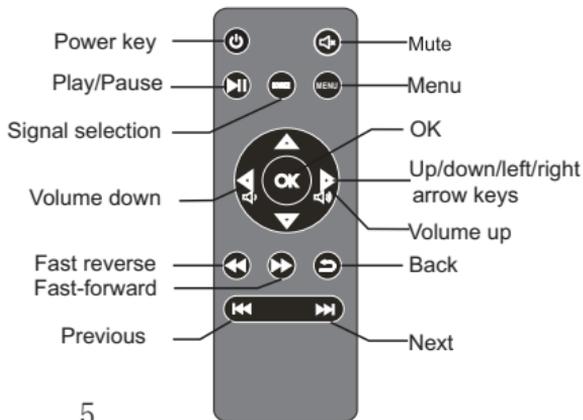

Menu: used to select functions

Signal sources: used to select the input channel of the signal

Power key: ON/OFF key

Play/Pause: used to play and pause when playing files, pictures and videos on USB flash disk

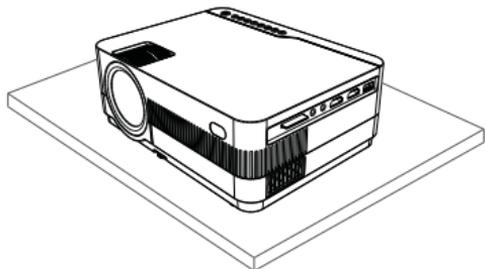

8.Remote control keys and functions

How to quickly install and debug the projector

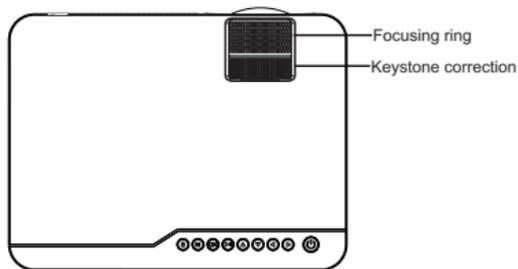

Installation and debugging

1 Projector installation

Place horizontally

2 Focal length setting

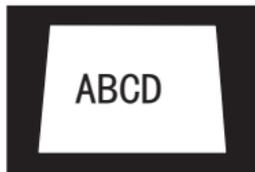

Adjust the keystone correction and focusing ring on the projector to obtain the satisfactory imaging effect.

When keystone distortion occurs (see Figure 1 on the right), it is recommended to adjust the keystone correction ring.

When the image is blurred (see Figure 2 on the right), it is recommended to adjust the focusing ring to improve the clarity of the image.

If satisfactory clarity cannot be achieved through adjustment, move the product forward or backward.

! Precaution

Keystone distortion

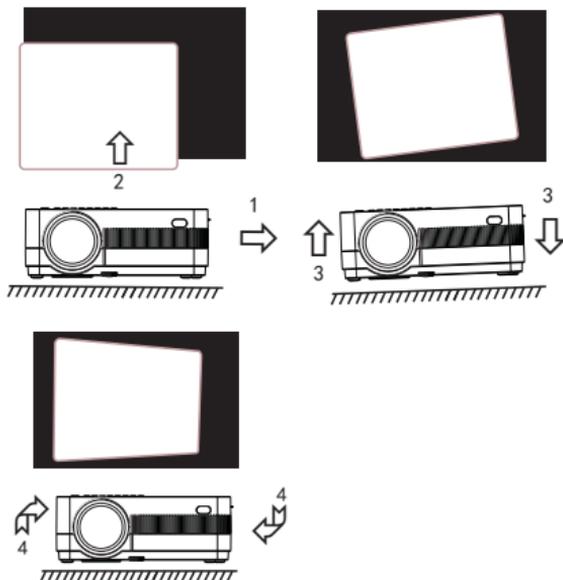

Blurred image

How to quickly install and debug the projector

Installation and debugging

3 Adjust the image projected onto the screen

Check the horizontal and vertical settings of the screen

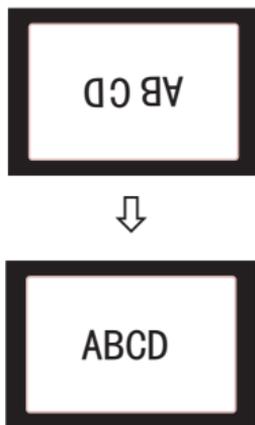

1. When the screen is offset to the left or right, move the projector to one side. (Center the screen at the center of the projector lens).
2. When shifting in a vertical direction, move the projector up or down.
3. If there is an angular offset, place the projector on a horizontal plane.
4. If the projection screen is as shown in the figure, it indicates that the projector does not face the screen directly. Please turn the projector to face the screen.

4 Startup & Shutdown

1. 5 seconds after power-on, press the key  on the projector panel or the remote controller to turn on the device.
2. Press the key  on the projector control panel or the remote control to turn off the device as prompted by the system.

When the machine is turned off, unplug the power line in time to save energy.

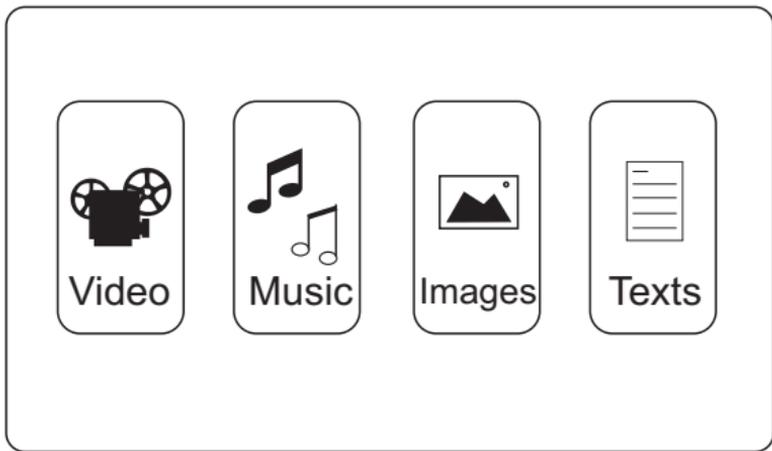

! Precaution

When the projector is suspended from the ceiling or in a rear projection system, please change the projection direction in the settings.

5 Multimedia boot screen

As the Artlii projector start working, the screen display(about 2-5 seconds)then come into the multimedia screen.

Projector settings

Properly set up the projector for better film experience. Main parameters of projection can be set up through the following steps.
